

GLOBAL HIGH DIVIDEND VALUE FUND as of 31/01/2026

MARKETING COMMUNICATION

INVESTMENT STRATEGY & APPROACH

The Tweedy, Browne Global High Dividend Value Fund seeks long-term capital appreciation by investing primarily in equity securities worldwide that offer above-average dividend yields, which generally include those with consistent or growing dividends, where investor expectations are currently modest but expected to improve. The Sub-Fund employs a traditional Benjamin Graham value investing approach, focusing primarily on securities trading at a discount from the adviser's assessment of intrinsic value, as defined by metrics such as book value, earnings, or private market value. The Sub-Fund is actively managed and does not aim to resemble a benchmark index.

COMMITMENT OF THE ADVISER

As of 31 December 2025, the current Managing Directors and retired principals and their families, as well as employees of Tweedy, Browne, had more than \$1.8 billion in portfolios combined with or similar to client portfolios.

¹ The **THE MSCI WORLD INDEX** is a benchmark created and calculated by Tweedy, Browne and represents the MSCI World Index (Hedged to EUR) from inception through 30 November 2022; and the MSCI World Index (in EUR) for periods thereafter. The change in benchmark composition represents the change in the Sub-Fund's hedging policy in November 2022. The **MSCI World Index** is an unmanaged, free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The **MSCI World Index (in EUR)** reflects the return of the MSCI World Index for a euro investor. The **MSCI World Index (Hedged to EUR)** consists of the results of the MSCI World Index with its non-EUR exposure 100% hedged back into EUR, and accounts for interest rate differentials in forward currency exchange rates.

Effective 16 November 2022, the Sub-Fund generally does not hedge its perceived foreign currency risk. The value of the Sub-Fund's shares and the return they generate can go down as well as up. They are affected by market volatility and by fluctuations in exchange rates. Upon redemption of shares in the Sub-Fund, investors may not receive the full amount invested. Past performance does not predict future returns. The performance data does not take account of any commissions and costs incurred on the issue and redemption of shares. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns. The breakdown into sectors and the individual investment items as well as indicated benchmarks are liable to change at any time in line with the investment policy. There are substantial risks involved in an investment in the Sub-Fund including market risk, liquidating risk, currency risk, and operational risk. For full information on the risks, please refer to the "Certain Risks Factors" section in the prospectus.
