MARKETING COMMUNICATION

INVESTMENT STRATEGY & APPROACH

The Tweedy, Browne International Value Fund (CHF) seeks long-term capital appreciation by investing worldwide in a diversified portfolio consisting primarily of equity securities. The portfolio's investments are focused on companies in developed markets, and where practicable, foreign currency exposure is hedged to the Swiss Franc. The Sub-Fund employs a traditional Benjamin Graham value investing approach, focusing primarily on securities trading at a discount from the adviser's assessment of intrinsic value, as defined by metrics such as book value, earnings, or private market value. The Sub-Fund is actively managed and does not aim to resemble a benchmark index.

COMMITMENT OF THE ADVISER

As of 31 March 2026, the current Managing Directors and retired principals and their families, as well as employees of Tweedy, Browne, had more than \$1.5 billion in portfolios combined with or similar to client portfolios.

¹ The **MSCI EAFE INDEX/MSCI WORLD INDEX** is a benchmark created and calculated by Tweedy, Browne and represents the MSCI EAFE Index (Hedged to CHF) from inception through 30 November 2022; and the MSCI World Index (Hedged to CHF) for periods thereafter. The change in benchmark composition represents the change in the Sub-Fund's mandate from International to Global in November 2022. The **MSCI EAFE Index** and **MSCI World Index** are unmanaged, free float-adjusted market capitalization weighted indexes that are designed to measure the equity market performance of developed markets (the US and Canada are excluded from the EAFE Index). The **MSCI EAFE Index (in CHF)** and **MSCI World Index (in CHF)** reflect the return of each respective index for a Swiss investor. The **MSCI EAFE Index (Hedged to CHF)** and **MSCI World Index (Hedged to CHF)** consists of the results of each respective index 100% hedged back into CHF. The indexes account for interest rate differentials in forward currency exchange rates. Index results are inclusive of dividends and net of foreign withholding taxes.

The value of the Sub-Fund's shares and the return they generate can go down as well as up. They are affected by market volatility and by fluctuations in exchange rates. Upon redemption of shares in the Sub-Fund, investors may not receive the full amount invested. Past performance does not predict future returns. The performance data does not take account of any commissions and costs incurred on the issue and redemption of shares. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns. The breakdown into sectors and the individual investment items as well as indicated benchmarks are liable to change at any time in line with the investment policy. There are substantial risks involved in an investment in the Sub-Fund including market risk, liquidating risk, currency risk, and operational risk. For full information on the risks, please refer to the "Certain Risks Factors" section in the prospectus.
